

CARING
FOR THE
ENVIRONMENT

GOLD CHAMPIONS NO.7

Green Sabbath

17/01/2012

"Join us on the
31st March 2012
for our, *No Drive
to Church Day.*"

Goals:

- 1000 people to walk 1000 miles...
- This works by each person walking at least 1 Mile
- Meet and talk to at least one unchurched person along the way

Let's Demonstrate:

- Seventh-day Adventist Church cares for the environment
- Active and friendly Outreach
- Promotion of health and care for our bodies by walking to church

This is an SEC sponsored evangelistic program

How it will work...

One person from each church will coordinate the plan for the day with the support of the Pastor, Elders, and church members. Starting this Sabbath, members should be encouraged to prepare for this day by getting a small team together to work out optional routes, car share, and alternatives for those who cannot participate.

Remember to keep the plans simple and straight forward as we all recognise that most of us drive a long way to our churches. So a simple option for most will be to drive to church as normal but park a mile away and walk this distance to church. This will help you witness to someone, keep a healthy focus, and free up neighbourhood parking frustrations!

Who knows, this could become a regular feature that has positive effects and gives our church a new 'Green' image.

We only ask that one person collects all the data for that local church including the total number of miles walked and then submits this information to us at: sdaolympicoutreach@gmail.com
